

Mahmoud El-Sayid Abdel-Razek

Flutter Developer

 mahmoud123tyu@gmail.com  +20 111 827 5246  El-Gharbia, Egypt  LinkedIn  GitHub

PROFILE

Computer Engineering student focused on Flutter development with hands-on experience in Dart, Bloc, Cubit, local storage, and API integration. Seeking an entry-level Flutter Developer role to build clean, user-friendly mobile applications.

EDUCATION

Dept. of Computer and Control System Engineering, 2022 – 2027 | Egypt
Faculty of Engineering, Mansoura University
• Focused on programming fundamentals, control systems, and collaborative problem solving.

SKILLS

Mobile Development - Flutter - Dart - Cross-platform development - Responsive Desgin - firebase	State Management - Bloc - Cubit - Getx - provider
Programming - C - C++ - OOP fundamentals - Python	Data & Storage - Hive - SharedPreferences - sqlite
API Integration - HTTP - Dio	Version Control - Git - GitHub

PROJECTS

- Evently, Event Management App** 
- Developed Evently, a Flutter event-management app that lets users create, edit, delete, explore, and view event details with pagination, filtering, and sorting.
 - Implemented secure authentication using JWT, secure token storage, automatic token refresh, and auto logout on refresh failure.
 - Built real-time user interaction features including event invitations, invite status tracking, notifications, unread counts, and paginated notification loading.
- Heart Check** 
- Developed a Flutter heart disease prediction app that collects clinical health inputs and connects them to a machine learning model for real-time risk assessment.
 - Integrated the ML prediction workflow through a REST API, handling user input validation, API communication, prediction responses, error states, and result management using BLoC.
 - Designed an intuitive user experience that presents ML results clearly through risk probability, visual indicators, contributing factors, metric cards, and personalized health recommendations.
- Dashboard, Responsive Dashboard UI** 
- Built a responsive Flutter dashboard UI for mobile, tablet, and desktop with reusable widgets, transactions, and analytics sections.
- Bookly, Book Discovery App** 
- Developed a Flutter book discovery app with search, detailed book pages, dark theme UI, and loading states using Bloc/Cubit and Dio.
- Chat App, Real Time Messaging App** 
- Built a real-time chat application using Flutter, Dart, Firebase Authentication, Cloud Firestore, and Bloc/Cubit. Implemented authentication flows, chat screens, and structured state management with separate cubits for chat, login, and registration.

CERTIFICATES

- Complete Flutter & Dart Development Course** 
Udemy, May 2025
- Mobile Development By Flutter** 
Sprints, Aug 2025
- Flutter Advanced Course Bloc and MVVM Pattern [Arabic]** 
Udemy, Mar 2026
- Mastering Flutter: Responsive & Adaptive UI Design** 
Tharwat Academy, Apr 2026
